

JRS-ARRS Global Partnership Neuroradiology Imaging Web Symposium

Important Topics in Pediatric and Adult Neuroradiology Imaging

I. Stroke Imaging

1. Acute Ischemic Stroke in Children: The Importance of Arteriopathies — James L. Leach, MD
2. Acute Ischemic Stroke in Adults — Pamela W. Schaefer, MD
3. Revisiting Current Golden Rules in Managing Acute Ischemic Stroke: Evaluation of New Strategies to Further Improve Treatment Selection and Outcome — William T. C. Yuh, MD; Matthew David Alexander, MD; Toshihiro Ueda, MD; Masayuki Maeda, MD; Toshiaki Taoka, MD; Kei Yamada, MD; and Norman J. Beauchamp, MD
4. Stroke Imaging: Case Review — Kei Yamada, MD

II. Diffusion MRI and White Matter

1. Diffusion MRI — Shigeki Aoki, MD
2. White Matter Anatomy: What the Radiologist Needs to Know — Manohar Shroff, MD
3. Pediatric White Matter Disease — Michael E. Zapadka, MD

III. Spinal Dysraphism

1. Imaging of Spinal Dysraphism — Kumiko Ando, MD
2. Differentiating Closed Versus Open Spinal Dysraphisms on Fetal MRI — Usha D. Nagaraj, MD; Karin S. Bierbrauer, MD; Jose L. Peiro, MD; and Beth M. Kline-Fath, MD
