The Japanese Journal of Radiology (JJR) is a peer-reviewed, double-blinded journal that is published under the supervision of the Board of Directors of the Japan Radiological Society (JRS), which appoints the Editor, who selects all materials for publication, including advertisements. No responsibility is accepted by the Board of Directors or the Editor for opinions expressed by the contributors. The Editors of JJR abide by the recommendations formulated by the International Committee of Medical Journal Editors (http://www.icmje.org/). Although JJR will receive materials prepared and submitted according to these requirements, the right is reserved to introduce any changes necessary to make the contributions conform to the individual editorial standards of this journal. JJR is committed to upholding the integrity of the scientific record. As a member of the Committee on Publication Ethics (COPE) the journal will follow the COPE guidelines on how to deal with potential acts of misconduct.

COPE: http://publicationethics.org/

EDITORIAL POLICIES SOLE SUBMISSION TO J JR
Authors must be certain that a manuscript on the same or similar material has not already been published by them or has not been or will not be submitted to another journal by them or by colleagues at their institution before their work appears in J JR. The submission by authors of similar material to advertising, news media, or other forms of publication must be indicated at the time J JR receives the manuscript, and a copy of that material should be provided with the submission. Please also note that J JR will not consider any manuscript it has previously rejected.

TRANSFER OF COPYRIGHT AND CERTIFICATIONS AGREEMENT
Authors whose manuscripts are accepted for publication in J JR will automatically receive from JRS a license for use of their images. This license extends for the full term of the copyright and allows authors to use and sublicense their images to others without requesting permission from JRS. If authors sublicense their images to commercial parties, they are required to notify JRS but need not request JRS’s permission. Each corresponding author will receive his or her image license after the manuscript is accepted for publication and sent to the JRS Publication Department for processing. Please note that this license is for images (defined as radiologic images, artwork, and related captions) but not for other elements of the accepted manuscript (i.e., text, graphs, tables, software).

Please submit the Certification Form with the initial submission of all proffered works via Editorial Manager. All authors of any single composition must sign this agreement. Consent to submit must have been received from all co-authors and responsible authorities at the institute/organization where the work has been carried out before the work is submitted. Authors whose names appear on the submission must have contributed sufficiently to the scientific work and therefore share collective responsibility and accountability for the results.

Changes of authorship or in the order of authors are not accepted after acceptance of a manuscript. Requests to add or delete authors at the revision stage or after publication is a serious matter, and may be considered only after receipt of written approval from all authors and detailed explanation about the role/deletion of the new/deleted author. The decision on accepting the change rests with the Editor of the journal.

HUMAN AND ANIMAL STUDIES
It is important that all participants give their informed consent in writing prior to inclusion in the study. Manuscripts reporting the results of studies on human subjects must include a statement in the title pages to the effect that informed consent was obtained after the nature of the procedure(s) had been fully explained, as shown in the following example.

Informed Consent
Informed consent was obtained from all individual participants included in the study. In addition, a statement affirming approval of the appropriate institutional review boards and accordance with the ethical standards as laid down in the 1964 Declaration of Helsinki and its later amendments is required in the title pages, as shown in the following example.

Ethical Statement
All procedures performed in studies involving human participants were in accordance with the ethical standards of the institutional and/or national research committee and with the 1964 Helsinki declaration and its later amendments or comparable ethical standards.

The maintenance and care of experimental animals to provide humane treatment and to ensure reliable results are described in the National Institutes of Health guidelines for the use of laboratory animals. Authors must affirm, as an ethical statement in the title pages, their compliance with these guidelines or approval by the appropriate institutional review board or animal care committee, as shown in the following example: “All applicable institutional and/or national guidelines for the care and use of animals were followed.” If articles do not contain studies with human participants or animals by any of the authors, J JR recommends including the following sentence as an ethical statement in the title pages: “This article does not contain any studies with human participants or animals performed by any of the authors.”

The Editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or failure to fulfill these requirements.

POTENTIAL CONFLICT OF INTEREST
Authors must indicate whether or not they have a financial relationship with the organization that sponsored the research. They should also state that they have full control of all primary data and that they agree to allow the journal to review their data if requested. Therefore the manuscript must be accompanied by the “Conflicts of Interest Self-Declaration of Authors (Form 2)”. This form can be obtained from http://www.springer.com/journal/11604/.

In a manuscript submitted to J JR, all disclosures should be inserted by the corresponding author in the title pages, as shown in the following example.

Conflict of Interest
A (author name) serves as a consultant to Z (entity name); B’s spouse is chairman of Y; C received a research grant from X; D received lecture fees from V; E holds a patent on U; F has been reimbursed by T for attending several conferences; G received honoraria for writing promotional material for S; H has no conflict of interest.

If no conflict exists, the authors should state: Conflict of Interest
The authors declare that they have no conflict of interest.

RIGHTS AND PERMISSIONS
Written permission (we require a copy) must be granted by the publisher (and by the author when applicable) to reproduce any previously published figures and tables. Any such material must be clearly noted and its source given in the manuscript.

To preserve the anonymity of patients and subjects, all potentially identifying information (including patient likenesses, identification numbers, names, and initials) must be removed from images, charts and graphs, tables, and the text before the materials are submitted to the Editorial Office. A signed letter of permission must be included with your manuscript for any individual who might be identified as a result of written descriptions, photographs (masking the eyes in photographs is not sufficient protection of anonymity), or other means. Such permission, which requires that the individual be shown the manuscript, should be affirmed in the text or figure caption as appropriate.

If reference is made in the text to personal communication (oral or written) as a source of information, a signed statement of permission is required from each such source. The year of receipt of the personal communication is required from each such source. The year of receipt of the personal communication should be provided in the text. Please see Acknowledgments below for additional required permissions.

MANUSCRIPT PREPARATION
In general, we recommend you review several recently published articles in J JR before manuscript assembly, so as to familiarize yourself with our format and requirements. Incomplete or improperly prepared manuscripts...
will be returned to authors without review. Each manuscript component should begin on a new page in this order: title pages, abstract, text, appendix, acknowledgments, references, tables (each on a separate page), captions (figure legends) for illustrations (figures), and illustrations. The title pages and the abstract page should not be numbered. Sequential numbering should begin with the text (Introduction). To ensure anonymity in the peer review process, authors’ names should appear on only the full title page; names of authors, their initials, or the institution should not be given in the text or on the illustrations. Avoid language that reveals work previously published by you (e.g., “as we have previously described”, “continuing our former work”, etc.). The anonymity of patients and subjects must be preserved; please see the Rights and Permissions section for more information.

Prerequisites for Publication
A Certification Form, included in each issue, must be signed by all authors and be submitted to the journal’s editorial office via Editorial Manager at the same time you submit your manuscripts. The form is also available at: http://www.springer.com/11604/.

IMPORTANT: Upon receipt of a Certification Form, manuscripts are officially recognized as submissions.

Manuscript Submission via Editorial Manager
Authors should submit their manuscripts to JJR online. Please log in directly at: https://www.editorialmanager.com/rmed and upload your manuscript following the instructions given on the screen. Please use the Help option to see the most recently updated system requirements.

MANUSCRIPT CATEGORIZATION TERMS
Submission may be in the category of
1. Original article
2. Review
3. Pictorial essay
4. Technical note
5. Special report
6. Letter to the editor
7. Editorial

These articles and reports should be concerned with
a. Diagnostic radiology
b. Interventional radiology
c. Radiation oncology
d. Nuclear medicine
e. Radiation physics
f. Radiation biology
g. Other radiology-related issues

These terms must be complied with before your manuscript can be evaluated.

TEXT FORMATTING
Manuscripts should be submitted in Word. Save your file in docx format (Word 2007 or higher) or doc format (older Word versions). Manuscripts must be double-spaced with wide margins throughout. Use a normal, plain font (e.g., 10-point Times Roman) for text. Use italics for emphasis. To number the pages, use the automatic page-numbering function. Do not use field functions. Use tab stops or other commands for indents, not the space bar. Use the table function, not spreadsheets, to make tables.

Headings
Please use no more than three levels of displayed headings.

Units and Abbreviations
Radiation measurements and laboratory values should be those given in the International System of Units (SI). Abbreviations should be spelled out when first used in the text, such as “cerebrospinal fluid (CSF)”; the number of abbreviations used should be kept to a minimum in general, only standard abbreviations will be used.

TITLE PAGES
This page should include the title of the manuscript; the first and last names, and middle initials of the author(s); the name and street address (not postal box) of the institution from which the work originated; the telephone number, fax number, and e-mail address of the corresponding author; and information concerning grants, the Conflict of Interest form, and the Ethical Statement. The address for correspondence should include the complete name, street address (not postal box), and postal code. Last, indicate the type of manuscript you are submitting: Original article; Review; Pictorial essay; Technical note; Letter to the editor; or Special report, with the word count of the text (not including references).

ABSTRACT AND KEY WORDS
All articles, except for Special reports, must have an abstract of 200 words or less. For Original articles and Technical notes, the abstract must be divided into four paragraphs with the following headings: Purpose; Materials and methods; Results; and Conclusion. Below the abstract, please list three to five key words derived from the text.

TEXT
Original article and Technical note
The text is arranged in sections with the headings Introduction, Materials and methods, Results, and Discussion. Lengthy papers may need subheadings within some sections to clarify their content, especially within the Materials and methods and Results sections. The text should not exceed 4,500 words (not including references), with a maximum of 8 figures.

Introduction: Give only strictly pertinent background information and references that inform the reader as to why you undertook your study. The final paragraph should clearly state the hypothesis or purpose of your study.

Materials and methods: For studies relating to humans, the first paragraph should indicate whether or not institutional review board approval and patient informed consent were obtained. This applies for both prospective and retrospective studies. Identify the methods, instrumentation (trade name and manufacturer’s name and location in parentheses), and procedures in sufficient detail to allow other workers to reproduce your study.

Results: Present the results in logical sequence in the text, along with tables and illustrations. Do not repeat in the text all the data in the tables and/or illustrations; summarize only important observations.

Discussion: Emphasize the advances in knowledge provided by your study and the conclusions that follow from them. Relate the observations to other relevant studies. Link the conclusion with the goals of the study, but avoid unqualified statements and conclusions not completely supported by the data.

Review
A review should focus on a specific topic in a scholarly manner. Neither new information nor personal opinion is to be included. The scope of the paper should be defined in the introduction, and headings should be used to separate and organize the text.

The text should not exceed 5,000 words (not including references), with a maximum of 20 figures.

Pictorial essay
This is a visual teaching material and should include teaching points, educational goals with a brief abstract. Introduction defines the scope and summary of the paper. Headings are used for separation and organization of the text. The text should not exceed 1,000 words (not including references), with a maximum of 30 figures. The maximum number of references is 15.

Special report
Any articles that are not classified in the other categories may be considered at the Editor’s discretion. Committee reports, guidelines, and articles dealing with quality assurance and health care policy are included in this category. There are no word limits or rules for the structure of Special reports. They may have a structured or unstructured abstract or no abstract.
Letter to the editor
Constructive criticism of a specific thesis published by JJR is welcome. Letters dealing with subjects of general interest within the field of radiology or personal opinions on a specific subject within the realm of scientific study may also be accepted. The text should not exceed 750 words (not including references). The maximum number of references is 4.

Editorial
An editorial consists of comments on the published articles from the editors of the journal, and will be published as a commissioned paper at the request of the Editor-in-Chief. The text should not exceed 750 words (not including references). No abstract, no key words, and no figures and tables.

Acknowledgments
Acknowledgments of people, grants, funds, etc. should be listed separately. Name those who have contributed substantially to the work reported in the manuscript. The names of funding organizations should be written in full.

References
Number references consecutively in the order in which they are first mentioned in the manuscript. Reference citations in the text should be cited sequentially and should be identified by numbers in square brackets. Examples include:

- Ames et al. [1] reported...
- Negotiation research spans many disciplines [3].
- This result was later contradicted by Becker and Seligman [5].
- This effect has been widely studied [1–3, 7].

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications and unpublished data should be cited in parentheses in the text. The abbreviations used for periodicals cited in the references should follow the style of the International Committee of Medical Journal Editors (“Vancouver Style”). For journal articles, list surnames and initials of all authors when six or fewer, such as:

In the case of journal articles by DOI:

In the case of books, the authors of a chapter, title of the chapter, editor(s), title of the book, edition, city; publisher; year, and specific page numbers must be provided.

Tables
Tables should be numbered in Arabic numerals and should have a title. Tables should always be cited in the text in consecutive numerical order. Identify any previously published material by giving the original source number of references is 4.

Captions for illustrations
A caption (figure legend) must be supplied for each illustration (figure), including drawings and graphs. It is essential that the caption describe all labels on an illustration.
ARTWORK GUIDELINES

Electronic Figure Submission
- Supply all figures electronically.
- For vector graphics, the preferred format is EPS; for halftones, please use TIFF format. MS Office files are also acceptable.
- Vector graphics containing fonts must have the fonts embedded in the files.
- Name your figure files with “Fig” and the figure number, e.g., Fig1.eps.

Line Art
- Definition: black and white graphic with no shading.
- Do not use faint lines and/or lettering and check that all lines and lettering within the figures are legible at final size.
- All lines should be at least 0.1 mm (0.3 pt) wide.
- Scanned line drawings and line drawings in bitmap format should have a minimum resolution of 1200 dpi.

Halftone Art
- Definition: photographs, drawings, or paintings with fine shading, etc.
- All lines should be at least 0.1 mm (0.3 pt) wide.
- Scanned line drawings and line drawings in bitmap format should have a minimum resolution of 300 dpi.

Combination Art
- Definition: a combination of halftone and line art, e.g., halftones containing line drawing, extensive lettering, color diagrams, etc.
- Combination artwork should have a minimum resolution of 600 dpi.

Color Art
- Color art is free of charge for online publication.
- If black and white will be shown in the print version, make sure that the main information will still be visible. Many colors are not distinguishable from one another when converted to black and white. A simple way to check this is to make a xerographic copy to see if the necessary distinctions between the different colors are still apparent.
- If the figures will be printed in black and white, do not refer to color in the captions.
- Color illustrations should be submitted as RGB (8 bits per channel).

Figure Lettering
- To add lettering, it is best to use Helvetica or Arial (sans serif fonts).
- Keep lettering consistently sized throughout your final-sized artwork, usually about 2–3 mm (8–12 pt).
- Variance of type size within an illustration should be minimal, e.g., do not use 8-pt type on an axis and 20-pt type for the axis label.
- Avoid effects such as shading, outline letters, etc.
- Do not include titles or captions in your illustrations.

Figure Numbering
- All figures are to be numbered using Arabic numerals.
- Figures should always be cited in the text in consecutive numerical order.
- Figure parts should be denoted by lowercase letters (a, b, c, etc.).
- If an appendix appears in your article/chapter and it contains one or more figures, continue the consecutive numbering of the main text. Do not number the appendix figures, “A1, A2, A3, etc.” Figures in online appendices (Electronic Supplementary Material) should, however, be numbered separately.

Figure Captions
- Each figure should have a concise caption describing accurately what the figure depicts. Include the captions in the text file of the manuscript, not in the figure file.
- Figure captions begin with the term Fig. in bold type, followed by the figure number, also in bold type.
- No punctuation is to be included after the number, nor is any punctuation to be placed at the end of the caption.
- Identify all elements found in the figure in the figure caption; and use boxes, circles, etc., as coordinate points in graphs.
- Identify previously published material by giving the original source in the form of a reference citation at the end of the figure caption.

Figure Placement and Size
- When preparing your figures, size figures to fit in the column width.
- Figures should be 39 mm, 84 mm, 129 mm, or 174 mm wide and not higher than 234 mm.
- The publisher reserves the right to reduce or enlarge figures.

Permissions
If you include figures that have already been published elsewhere, you must obtain permission from the copyright owner(s) for both the print and online format. Please be aware that some publishers do not grant electronic rights for free, and that Springer will not be able to refund any costs that may have occurred to receive these permissions. In such cases, material from other sources should be used.

Accessibility
In order to give people of all abilities and disabilities access to the content of your figures, please make sure that:
- All figures have descriptive captions (blind users could then use a text-to-speech software or a text-to-Braille hardware).
- Patterns are used instead of or in addition to colors for conveying information (color-blind users would then be able to distinguish the visual elements).
- Any figure lettering has a contrast ratio of at least 4.5:1.

ELECTRONIC SUPPLEMENTARY MATERIAL GUIDELINES

Submission
- Supply all supplementary material in standard file formats.
- To accommodate user downloads, please keep in mind that larger-sized files may require very long download times and that some users may experience other problems during downloading.

Audio, Video, and Animations
Always use MPEG-1 (.mpg) format.

Text and Presentations
- Submit your material in PDF format; .doc or .ppt files are not suitable for long-term viability.
- A collection of figures may also be combined in a PDF file.

Spreadsheets
Spreadsheets should be converted to PDF if no interaction with the data is intended.
If the readers should be encouraged to make their own calculations, spreadsheets should be submitted as .xls files (MS Excel).

Specialized Formats
Specialized formats such as .pdb (chemical), .wrl (VRML), .nb (Mathematica notebook), and .tex can also be supplied.

Collecting Multiple Files
It is possible to collect multiple files in a .zip or .gz file.

Accessibility
In order to give people of all abilities and disabilities access to the content of your supplementary files, please make sure that:
- The manuscript contain a descriptive caption for each supplementary material.
- Video files do not contain anything that flashes more than three times per second (so that users prone to seizures caused by such effects are not put at risk).
Prerequisites for Publication

Accordingly, each person listed as an author or coauthor for a submitted report (excepting Review articles) must meet all three criteria. An author or coauthor shall have:
1. Conceived, planned, and performed the work leading to the report, or interpreted the evidence presented, or both;
2. Written the report or reviewed successive versions and participated in their revision;
3. Approved the final version.

Meeting these criteria should provide each author with sufficient knowledge of and participation in the work to allow him or her to accept public responsibility for the report.

Certification: This Certification Form should be signed and submitted with the manuscript. The senior or corresponding author is requested to certify that all listed authors qualify for authorship according to the above three criteria. The author(s) should also certify that: no part of the work described has been published before [except in the form of an abstract or as part of a published lecture, review, thesis, or dissertation (appropriately cited)]; that the work is not under consideration for publication elsewhere; and that the manuscript, or its parts, will not be published elsewhere subsequently in any language without the consent of the copyright holders.

Animal and human research: Research involving humans must be carried out in accordance with the ethical standards of the responsible committee (institutional or regional) or with the Helsinki Declaration. Studies involving animal experimentation must include a statement of compliance with the guidelines of the author’s institution or the National Research Council’s criteria (NIH No. 86-23).

Certification Form

Conflicts of Interest Self-Declaration of Authors

Corresponding author’s name: ________________________________

Manuscript Title: ____________________________________________

Each author is required to complete and return this form to the corresponding author.
The corresponding author should upload all of the forms online.

When submitting a manuscript to the Japanese Journal of Radiology (JJR), all authors are required to disclose any financial relationship (within the past 12 months) with a biotechnology manufacturer, a pharmaceutical company, or any other commercial entity that has an interest in the subject matter or materials discussed in the manuscript. Matters requiring disclosure are outlined in the Japan Radiological Society Guidelines on Management of Conflicts of Interest in Clinical Research (URL: http://www.radiology.jp/modules/english/index.php?id=9).

If you, your spouse, your relatives in the first degree, or persons who share income/assets with you have any of the listed relationships with a commercial entity that has an interest in the subject matter in your manuscript, please refer to the Japan Radiological Society's definition for potential conflict of interest (URL: http://www.radiology.jp/modules/english/index.php?id=9) that must be disclosed, then check the appropriate “Yes” box below and provide details. If the listed relationship does not apply to you or your family member, check the appropriate “No” box.

In a manuscript submitted to JJR, all disclosures should be inserted by the corresponding author in the title pages. If no conflict of interest is declared, then “The authors declare that they have no conflict of interest.” should be inserted.
